GM REMOTE ON-BOARD PROGRAMMING INSTRUCTIONS

Most GM vehicles for model years 2011+ require a dealer or aftermarket programming tool.

GM FOBS

Vehicles equipped with a "Drivers Information Center" or DIC

This display allows you to match Remote Keyless Entry (RKE) transmitters to your vehicle. This procedure will erase all previously learned transmitters. Therefore, they must be relearned as additional transmitters.

1. Insert key and turn to ON position so you can access Driver Information Center.
2. Press the vehicle information button until "PRESS V TO RELEARN REMOTE" displays.
3. Press the set/reset button until "REMOTE KEY LEARNING ACTIVE" displays.
4. Press and hold the lock and unlock buttons on the first transmitter at the same time for approximately 15 seconds. On vehicles with memory recall seats, the first transmitter learned will match driver 1 and the second will match driver 2. A chime will sound indicating that the transmitter is programmed.
5. To program additional transmitters at this time repeat step 4. This vehicle can have a maximum of eight transmitters matched to it.
6. To exit programming mode, **you must cycle the key to LOCK/OFF. Test remote(s).**

Vehicles without a "Drivers Information Center" or DIC

To access this display, the vehicle must be in Park (P) with the key in the ON position (as far as you can go without cranking the engine). This display allows you to match Remote Keyless Entry (RKE) transmitters to your vehicle. This procedure will erase all previously learned transmitters. Therefore, they must be relearned as additional transmitters.

1. Press trip odometer reset stem until "RELEARN REMOTE KEY" displays.
2. Press and hold the trip odometer stem for three seconds. The message "REMOTE KEY LEARNING ACTIVE" will display.
3. Press and hold the lock and unlock buttons on the first keyless remote at the same time for approximately 15 seconds. A chime will sound indicating that the remote is programmed.
4. To program additional remotes at this time, repeat step 3. This vehicle can have a maximum of eight remotes programmed.
5. To exit programming mode, **turn key off and remove key. Test remote(s).**
